PROFILE SUMMARY

Software Engineer with 2 years experience in **JavaScript, TypeScript, React.js, Next.js, Node.js, Nest.js** and **PostgreSQL, Azure Redis** specializing in building and optimizing **RESTful APIs**, scalable web applications, and interactive user interfaces with strong problem-solving Proficient in **React ecosystem** (Redux, React Router), **Express.js**, and **JWT-based authentication**, with strong understanding of clean architecture and component-based UI development. Experienced in writing efficient, secure, and maintainable code with a focus on **performance optimization, frontend responsiveness, and backend scalability**. Adept in working within **Agile teams**, using **Git, JIRA**, and modern CI/CD workflows.

SKILLS

Programming Languages:	JAVA, PYTHON, JAVASCRIPT, TYPESCRIPT, C++
Frameworks/Libraries:	React.js, Next.js, Node.js, Nest.js, CSS
Databases:	MySQL, PostgreSQL, MongoDB, Redis
Tools and Technologies:	Git/GitHub, Docker, Bitbucket, Rest Api, Postman
Cloud:	AWS((Lambda, S3, EC2, API Gateway), Azure

EXPERIENCE

Full Stack Developer Codefork Technologies Private Limited - SDLC Corp, Noida	Sep 2025 - March 2026 <i>Noida</i>
--	---------------------------------------

- Developed **AI-driven full-stack applications** using **TypeScript, Next.js, Nest.JS**, and MongoDB, improving automation, decision-making, and system intelligence.
- Designed and optimized scalable backend services with **Nest.JS**, supporting high-performance, AI-enabled workflows and microservice-based architecture.
- **Designed and implemented JWT-based authentication and role-based authorization**, improving data security and user access control while maintaining compliance with standard best practices.
- **Built** reusable, maintainable **UI components** using **React + TypeScript + JavaScript**, enhancing frontend development speed and reducing code duplication across the application by **40%**.
- **Managed relational data operations** using **PostgreSQL**, including schema design, table relationships, indexing, and query optimization for efficient data retrieval and integrity.
- Technologies: **JavaScript, TypeScript, React.js, Nest.js, Redux, Nest.js , Axios, Node.js, Express.js, PostgreSQL, JWT, REST APIs, Git, GitHub.**

Associate Software Developer Ansh Soft Tech	Jan 2024 -Feb 2025 <i>Pune</i>
--	-----------------------------------

- Designed and developed **end-to-end full-stack web applications** using **TypeScript, React, Node.js, and Express**, focusing on scalability, performance, and clean architecture.
- Built and integrated **secure authentication and authorization systems** using OAuth2 and JWT, enabling protected access and role-based permissions across multiple user types.
- Developed **modular RESTful APIs** with **Express and TypeScript**, ensuring efficient communication between frontend and backend with structured and maintainable code.
- Created **dynamic and reusable UI components** using **React and TypeScript**, improving development efficiency and maintaining a consistent user interface across the platform.
- Implemented robust global state management using **Redux and Context API**, effectively handling complex application state across multiple modules. Designed optimized state structures, actions, and reducers to ensure predictable data flow, minimize unnecessary re-renders, and improve overall application performance and user experience.

- Engineered and fine-tuned **PostgreSQL database systems** by designing scalable schemas, establishing optimized relationships, and implementing advanced indexing techniques. Improved query execution speed, maintained data consistency, and supported high-volume transactional operations.
- **Technologies: JavaScript, TypeScript, React.js, Redux, React Router, Axios, Node.js, Express.js, PostgreSQL, JWT, REST APIs, Git, GitHub.**

Software Developer Intern - Aiwf Technologies Private Limited, (TALVIEW), Bengaluru

Jan 2024 – April 2024

- Developed and maintained scalable web applications using **React and Redux-Saga**, focusing on creating responsive user interfaces and managing complex application states efficiently.
- Built and optimized **RESTful APIs using Node.js and Express**, ensuring smooth and efficient data flow and communication between the frontend and backend components.
- Collaborated closely with the development team to identify, **debug**, and resolve technical issues, while also enhancing overall **UI/UX features** for better usability and performance.
- **Utilized Git and GitHub** for version control and team collaboration, ensuring structured code commits, effective branch management, and clean pull request workflows.
- **Technologies: React.js, TypeScript, JavaScript, Node.js, MongoDB, Redux, Rest Api, JWT.**

EDUCATION

Bachelor's of Technology, Computer Science, 8.79cgpa
IES College of Technology, Bhopal, MP

Sep 2020- Jun 2024

PROJECTS

Doctor Appointment.

- Developed a **full-stack web application** for booking doctor appointments, enabling patients to easily find and schedule consultations with healthcare professionals
Doctor Profiles: Created dynamic doctor profiles including specialization, availability, and ratings.
- Built a **full-stack** doctor appointment booking system with secure **JWT**-based login for doctors and patients, dynamic doctor profiles, and real-time appointment scheduling.
- Developed a feature-rich **Admin Panel** with secure login, enabling administrators to manage the entire platform including **users, doctors, appointments, and system configurations**. Included capabilities like status updates, filtering, pagination, and activity logs for efficient control and monitoring.
- Followed MVC architecture and **REST API** standards to maintain scalable and maintainable backend logic.
- **Technologies: React.js, JavaScript, Node.js, Express.js, MongoDB, Redux, Rest Api, JWT.**

CERTIFICATIONS

- **Mern Full Stack Certification – SCA Live**
Demonstrated expertise in full-stack web development using **MongoDB, Express.js, React.js, and Node.js**, covering RESTful API development, secure authentication, state management, and responsive UI design.
- **Java Full Stack Certification – SCA Live**
Validated skills in full-stack development using **Core Java, JSP/Servlets**, along with frontend technologies like **HTML, CSS, and JavaScript**, focusing on building interactive web applications and server-side logic.

CODING PROFILES

- **5 star** HackerRank java
- **300+** java problems solved on CodeChef
